Let's get better educated on this important topic!

In January, 2017 PG&E started sending letters to Sebastopol customers demanding they agree to the installation of a Smart Meter or pay fees to keep their analog meter. This is in direct disregard of the city's Smart Meter installation ban.

This eye-opening [film](#) investigates how utility Smart Meters are being rolled out across North America without informed consent. The film uncovers alarming issues about health, privacy, property rights, corporate fraud and the unprecedented vulnerability of the Smart Grid.

Speaker [Satya Giordano](#) of the [EMF Center](#) has been doing EMF assessments locally since 2014. Satya is passionate about making the world safer and healthier and does special independent EMF-reduction at schools.

Sponsored By: [LITE Initiatives](#), [Zero Waste Sonoma County](#) and the [EMF Safety Network](#) - which are all based in Sebastopol. RSVP to lite@sonic.net.
